PRELIMINARY AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This amendment is submitted for consideration with a concurrently filed continued prosecution application. Please enter the following amendments.

IN THE SPECIFICATION

Please delete the paragraph beginning at page 49, line 30 and ending at page 50, line 7 and substitute therefor the following new paragraph:

DI
HMM can be used in other ways as well. Instead of applying the generated profile to identify previously unidentified family members, the HMM profile can be used as a template to generate de novo family members (e.g., intermediate members of a cladistic tree of nucleic acids). For example, the program, HMMER is available at hmmerr.wustl.edu (on the world wide web). This program builds a HMM profile on a defined set of family members. A sub-program, HMMEMIT, reads the profile and constructs de novo sequences based on that. The original purpose of HMMEMIT is to generate positive controls for the search pattern, but the program can be adapted to the present invention by using the output as in silico generated
